Sacramento, CA | 916-272-5638 | [billhuynh.builds@gmail.com](mailto:billhuynh.builds@gmail.com) | billhuynhbuilds.com

## Professional Summary

---

Operations lead, MPH candidate, and independent trader with experience across operations, marketing, research, data analysis, and customer experience. Skilled at translating complex information into structured processes, analyzing performance data, understanding behavior, and improving systems. Since entering the markets in 2023, I have developed a disciplined focus on trading education, psychology, journaling, backtesting, and rule-based decision-making.

## Trading & Independent Research

---

### Independent Trader & Market Researcher

May 2023 - Present

- Develop and refine a structured ICT-based trading model using higher-timeframe bias, liquidity, market structure shifts, displacement, FVG/IFVG entries, defined invalidation, and liquidity-based exits.
- Maintain a structured trading journal tracking strategy criteria, entries, exits, risk, market context, timestamped emotions, psychology, and post-trade reflections.
- Use TradeZella to backtest one strategy across three-month periods, analyzing performance data, identifying patterns, and refining rules before retesting.
- Study how personality, preparation, stress, confidence, and emotional state influence execution and decision-making.

## Experience

---

### Co-Do Noodle House

Sacramento, CA

#### Restaurant Operations Manager

August 2023 - Present

- Manage daily operations across a multi-location restaurant business, coordinating people, processes, vendors, and customer experience while supporting consistent execution across locations.
- Build relationships with customers, employees, vendors, and external partners while translating feedback and performance data into practical process improvements.
- Initiated social media marketing efforts by sourcing marketing partners, coordinating meetings, and communicating business objectives and audience needs.

### River City Food Bank

Sacramento, CA

#### Data Analyst Intern

January 2026 - Present

- Lead a needs assessment and analyze client intake and operational data to identify service barriers, workflow inefficiencies, and opportunities to improve access.
- Translate findings into clear, data-backed recommendations for stakeholders, contributing to a 10.8% improvement in workflow efficiency.
- Collaborate with organizational stakeholders to understand operational needs, improve administrative processes, and turn research findings into usable recommendations.

### Chamberlain University

Chicago, Illinois

#### Graduate Research

August 2024 - January 2026

- Interpreted research findings and translated complex information into organized conclusions, reports, and recommendations for varied audiences.
